**Subject:** HPE CM: Re: Further testing of Ms Folbigg  
**Follow Up Flag:** Follow up  
**Flag Status:** Completed

I agree with Jon's requests.

It would be important to also have a detailed cardiac-related clinical history from Mr Folbigg's side of the family, since I understand that one of his nephews died of SIDS. This information will be important to interpret variants.

Best,  
Carola

The testing will be defined by the attending cardiologist, but as a minimum I would expect

1. A thorough clinical history relevant to cardiac issues
2. A good clinical examination
3. Resting 12 lead ECG
4. Standing and exercise ECG with post exercise recording to at least 6 minutes
5. Echocardiogram
6. Holter (24 hour ECG)

All the best  
Jon

**Subject:** Further testing of Ms Folbigg

Dear Professors Skinner and Vinuesa,

Further to last week's meeting of the data interpretation panel, please confirm by reply-all the types of cardiac tests you recommend should be undertaken in respect of Ms Folbigg.

Kind regards,

Amber Richards
